SUMMARY OF QUALIFICATIONS

- **Languages:** C++, Python, JavaScript, SQL, MongoDB, Java, HTML, CSS, C#, C, MATLAB
- **Technologies:** React, MySQL, Express, Node.js, Linux, QNX, Vue.js, Unity, VS Code, Momentics, gtest, gmock, Git, SonarQube

EXPERIENCE

Power Management Software Developer

Ford Motor Company of Canada

- Jan. 2020 - April 2020
 - Produced large-scale, thread-safe and performance-oriented software using **C++** to manage data from Controller Area Networks (**CAN**) across three Electronic Control Units (ECUs)
 - Used **VS Code** and **Momentics** to develop cross-platform code to run on **Linux** and **QNX** embedded systems
 - Delivered debugging tool which enabled CAN messaging, resource state querying, and power states requests during testing
- Sept. 2020 - Dec. 2020
 - As the person second-most experienced with the code base, I brought forward major design decisions and implemented critical new features while increasing code stability and maintainability
 - Expanded unit test coverage by 25% using **gtest** and **gmock** frameworks in first two weeks
 - Completely redesigned the team's API to allow for request status callbacks and a simplified use case based requesting interface

Software Developer

Big River Technologies Inc. May 2019 - Aug. 2019

- Designed and built a **MySQL** database to improve tracking of employee provisioning and access management
- Used **React** to implement new client features and defect fixes
- Developed coding best practice and company standards documentation

Cancer Radiotherapy Research Assistant

Grand River Regional Cancer Centre Sept. 2019 - Mar. 2020

- Worked with doctors and professors in a study to analyze retrospective radiation therapy data for the optimization of brain cancer treatment
- Developed **Python** scripts to extract and visualize treatment plan data from radiation modelling system

Vice-President of Finance

UWaterloo Residence Council Sept. 2018 - April 2019

- Managed spending of \$7200 account to ensure all events could be successfully run and efficiently co-lead general council meetings

PROJECTS

Augmented Reality Android App

Best VR/AR Hack, BrickHack 5 Feb. 2019

- Developed a facial recognition and information display app for the Vuzix Blade smart glasses in under 24 hours with the use of **Unity**, Vysor, and Vuforia

Note-Taking Web App

Personal Project Dec. 2020

- Used **React**, **Express**, **Node.js**, and **MongoDB** to create a dynamic web app for tracking notes, reminders, and to-do items

Grocery/M Meal Prep. Web App

BrickHack 6 Feb. 2020

- Built a grocery list application using **Vue.js**, **Spring** and **MySQL** that monitors the user's pantry and determines what products need purchasing for selected recipes

EDUCATION

Candidate for BAsC. in Biomedical Engineering, Computing Option

University of Waterloo 2018 - exp. 2023

Dean's Honour List 89% Avg, 3.82 GPA

Ranked 8th in Program

Relevant Courses:

- Software Design and Architecture
- Data Structures and Algorithms (**C++**)
- Digital Computation (**C#**)
- Circuits and Instrumentation
- Statistics
- Image Processing

ACTIVITIES/INTERESTS

- University orientation organizer/leader
- Competing in hackathons
- Engineering Society Council
- Hockey, Skiing, Volleyball, Ultimate Frisbee
